The Commission's Third Report and Order in PS Docket No. 07-114 adopted a rule providing that new CMRS network providers meeting the definition of covered CMRS providers in Section 20.18 and deploying new stand-alone networks must meet the handset-based location accuracy standard in delivering emergency calls for Enhanced 911 service. The rule requires that new stand-alone CMRS providers must satisfy the handset-based location accuracy standard at either a county-based or Public Safety Answering Point (PSAP)-based geographic level. Additionally, in accordance with the pre-existing requirements for CMRS providers using handset-based location technologies, new stand-alone

CMRS providers are permitted to exclude up to 15 percent of the counties or PSAP areas they serve due to heavy forestation that limits handset-based technology accuracy in those counties or areas but are required to file an initial list of the specific counties or portions of counties where they are utilizing their respective exclusions.

A. Updated Exclusion Reports. Under this information collection and pursuant to current rule section 20.18(h), new stand-alone CMRS providers and existing CMRS providers that have filed initial exclusion reports are required to file reports informing the Commission of any changes to their exclusion lists within thirty days of discovering such changes. The permitted exclusions properly but narrowly account for the known technical limitations of either the handset-based or network-based location accuracy technologies chosen by a CMRS provider, while ensuring that the public safety community and the public at large are sufficiently informed of these limitations.

B. Confidence and Uncertainty Data. Under this information collection and pursuant to current rule section 20.18(h), all CMRS providers and other entities responsible for transporting confidence and uncertainty data between the wireless carriers and PSAPs, including LECs, CLECs, owners of E911 networks, and emergency service providers (collectively, System Service Providers (SSPs)) must continue to provide confidence and uncertainty data of wireless 911 calls to Public Safety Answering Points (PSAP) on a per call basis upon a PSAP's request. New stand-alone wireless carriers also incur this obligation. The transport of the confidence and uncertainty data is needed to ensure the delivery of accurate location information with E911 service.
